

I understand that you are considering a new broadcast service known as Low Power FM that will be making these Low Power FM stations become priority over some other stations already in service. One such station is K-LOVE. This would affect me since I am christian man who appreciates being able to listen to a radio station that helps me in my daily walk with the Lord. Myself and others in like myself in my community look forward to having the decision to listen to broadcasts that are both positive and family friendly. K-LOVE is a good alternative to the other stations on the radio for those who want something aimed at our faith. Please don't take our freedom of choice away.
